UP N DOWN — ICE BLUE DENIM

Separate pictures with dedicated detailing pages for sample-room and factory reference.

Development note: This PDF separates the original concept board into focused pages so the tear map, embroidery, trim and stitch details can be inspected independently.

01 / GARMENT FRONT + BACK

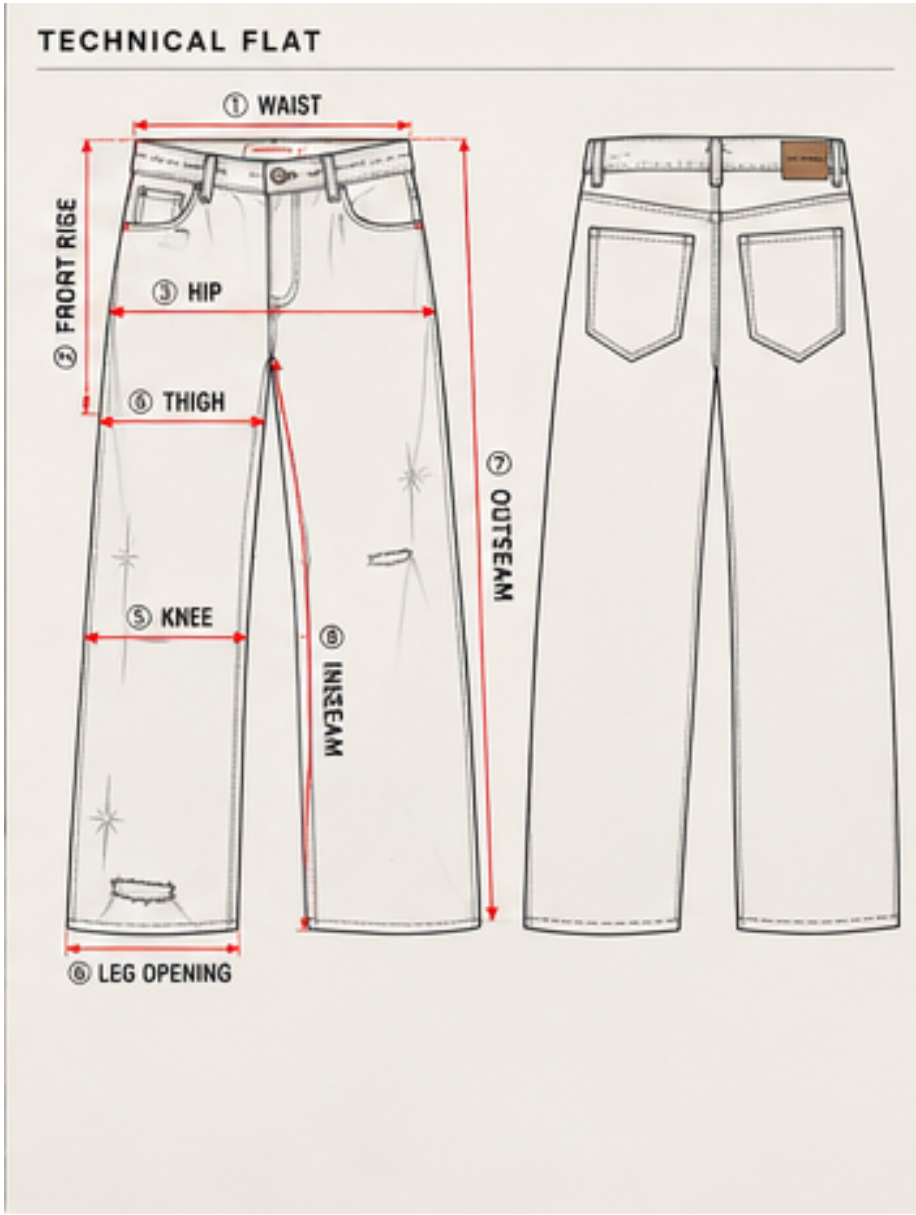

Fit: loose/baggy straight leg, mid rise, relaxed seat and thigh, wide leg opening and slight stacking at hem.

Wash: ice-blue vintage wash with soft cloudy fading, slightly darker seam shading and warm light distress yarns. Match left/right panels after wash.

Key details: subtle UD thigh embroidery, side star embroidery, minimal horizontal tears, antique-silver hardware, woven label inside back waistband.

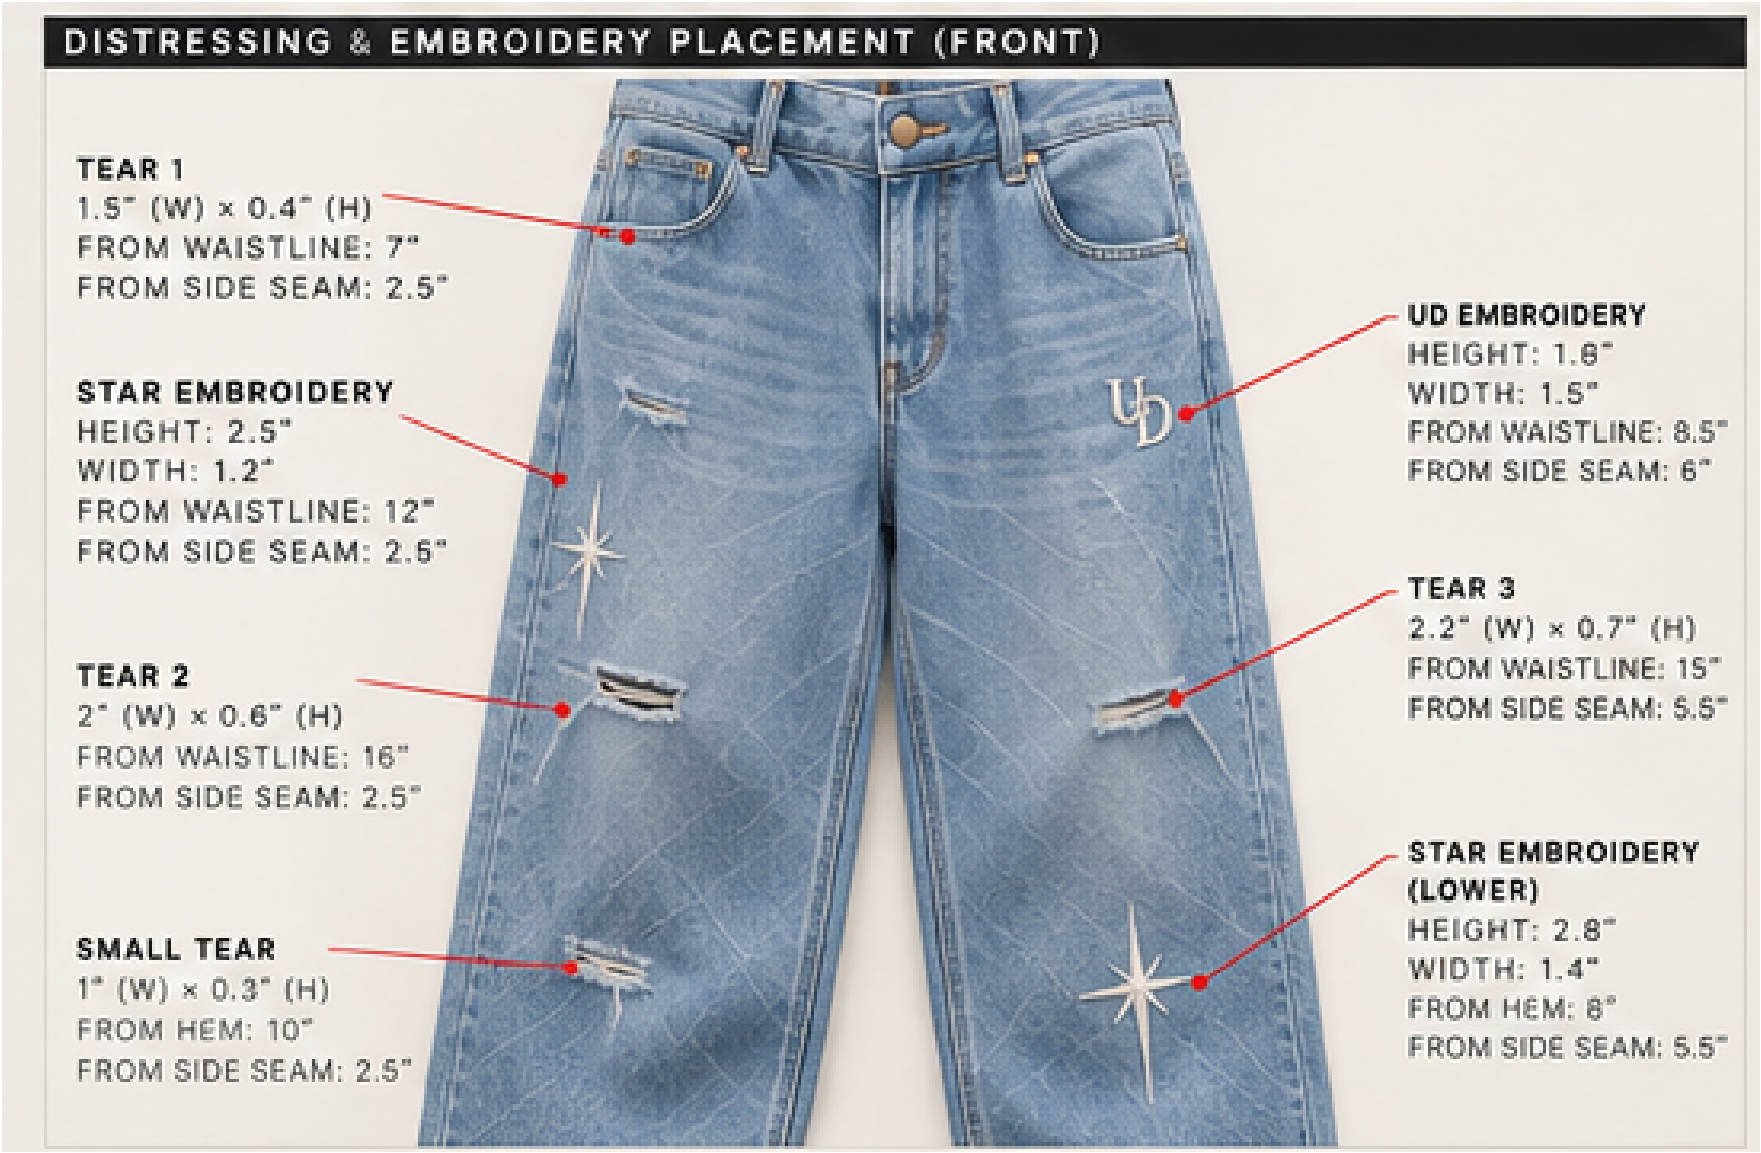

02 / TECHNICAL FLATS + POINTS OF MEASURE

POINT	PROPOSED TARGET / HOW TO MEASURE
	Measure flat across top waistband with garment buttoned; double for approximate circumference.
Front rise	Crotch seam intersection to top edge of front waistband.
	Crotch seam intersection to top edge of centre-back waistband.
Hip	Straight across at the agreed hip line, typically around 8 in below waistband; document exact method.
	Across leg approximately 1 in below crotch, perpendicular to inseam.
Knee	Across leg at a fixed point below crotch; use same point for all sizes.
	Across finished hem from edge to edge.
Inseam / outseam	Measure along seam from crotch to hem / waistband to hem.

Dimensions visible on the concept graphic are development targets only. Confirm exact measurements on the approved physical sample before grading or cutting bulk.

03 / FRONT DISTRESSING — SEPARATE DETAIL

DETAIL	[illegible]	[illegible]	[illegible]
	1.5 × 0.4 in	Approx. 7 in below waistband; 2.5 in from outer side seam.	Short horizontal slit, pale weft visible; frayed edge controlled.

DETAIL	PROPOSED OPENING	PLACEMENT REFERENCE	FINISH
Tear 2 — mid	2.0 × 0.6 in	Approx. 12 in below waistband; 2.5 in from outer side seam.	Slightly wider horizontal tear; retain select horizontal yarns.
	2.2 × 0.7 in	Approx. 15 in below waistband; 5.5 in from side seam.	Irregular narrow opening; reinforce from reverse.
Small tear	1.0 × 0.3 in	Approx. 10 in above hem; 2.5 in from outer side seam.	Light abrasion/slit; minimal loose yarns.

Make openings only after taping placements on the approved sample. Use reverse reinforcement where needed; inspect after wash and pull test.

04 / BACK DISTRESS + POCKET DETAIL

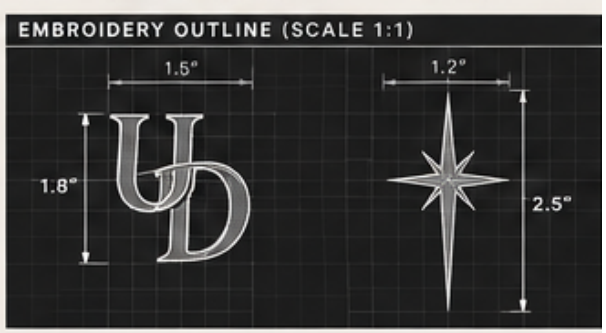

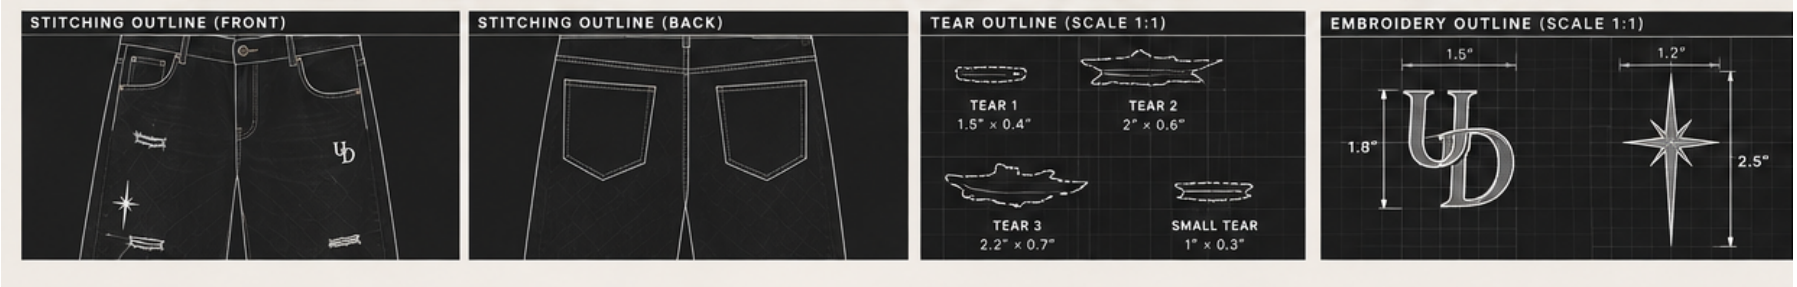

Back tear target: 1.2 × 0.4 in horizontal opening, approximately 12 in below the waistband and 5 in from the side seam; keep clear of pocket stitching and stress seams.

Back pockets: proposed width 5.5 in × height 5.8 in; set top edge approximately 2.5 in below waistband. Mirror the placement on both sides and confirm against the W32 pattern.

Finish: subtle fraying, no large holes, no unstable long yarns. Reinforce reverse if the opening may grow during wash.

05 / EMBROIDERY + OUTLINE DETAILS

ARTWORK	[illegible]	[illegible]	[illegible]
	Approx. 1.5 in wide × 1.8 in high	Wearer's right front leg; approx. 8.5 in below waistband and 6 in from side seam.	Satin columns for monogram body; clean outline where necessary.
Upper side star	Approx. 1.2 in wide × 2.5 in high	Centre approx. 12 in below waistband and 2.5 in from side seam.	Fine running-stitch outline or narrow satin stitch; avoid dense fill.
	Approx. 1.4 in wide × 2.8 in high	Centre approx. 8 in above hem and 5.5 in from side seam.	Outline-first; short satin sections for points if required.
Thread / backing	Soft ivory, warm grey or tonal ice blue	Choose after approving the washed sample.	Use denim-compatible thread and suitable stabiliser; test for puckering and wash fastness.

Machine embroidery needs stitch digitizing. This page is an artwork/placement reference, not a DST stitch file. Request a stitch simulation and physical strike-off before bulk sewing.

06 / HARDWARE + TRIMS

SIZE CHART (INCHES)

SIZE	28	30	32	34	36
① WAIST	28	30	32	34	36
② FRONT RISE	11.0	11.5	12.0	12.5	13.0
③ BACK RISE	14.0	14.5	15.0	15.5	16.0
④ HIP	40	42	44	46	48
⑤ THIGH	26	27	28	29	30
⑥ KNEE	22	23	24	25	26
⑥ LEG OPENING	20	21	22	23	24
⑦ OUTSEAM	41.5	42.0	42.5	43.0	43.5
⑧ INSEAM	30	30	31	31	32

FIT TYPE

LOOSE FIT / BAGGY

MID RISE | WIDE LEG | OVERSIZED FALL

FABRIC SPECIFICATION

FABRIC	100% COTTON DENIM
WEIGHT	12.5 – 13.5 OZ (HEAVYWEIGHT)
WEAVE	3/1 TWILL
COLOUR	ICE BLUE (VINTAGE WASH)
WASH PROCESS	LIGHT STONE WASH + BLEACH WASH SOFT HAND FEEL
SHRINKAGE	< 3%
STITCH THREAD	LIGHT BEIGE / ICE BLUE (TONAL)

HARDWARE & BRANDING DETAILS

CUSTOM BUTTON
MATTE FINISH
UD LOGO ENGRAVED
SIZE: 17MM

RIVET
PLAIN RIVET
ANTIQUE SILVER
SIZE: 9MM

YKK ZIPPER
ANTIQUE SILVER
SIZE: 4.5"

BACK PATCH
PU LEATHER
SIZE: 50MM X 35MM
EMBOSSED LOGO

INSIDE WAISTBAND LABEL
WOVEN LABEL
SIZE: 60MM X 20MM

BELT LOOP
WIDTH: 12MM
HEIGHT: 55MM

ITEM	TARGET SPECIFICATION	CHECK
	UD mark; matte/antique-silver finish; approx. 17 mm diameter.	Securely attached; no sharp edges or finish loss.
Rivets	Plain rivet, antique silver; approx. 9 mm head.	No rust, loose setting or fabric damage.
	Antique-silver metal zipper; approx. 4.5 in length.	Smooth open/close after wash.
Back patch	Muted tan/brown PU or approved woven patch; proposed 50 × 35 mm.	Consistent placement and clean edges.
	Woven UP N DOWN label; proposed 60 × 20 mm, centred inside back waistband.	Straight, soft and securely sewn.
Belt loops	Proposed finished width 12 mm; height approx. 55 mm depending on waistband/pattern.	Even spacing and reinforced ends.

07 / ICE BLUE WASH + QUALITY CONTROL

Colour direction: pale ice blue with a soft stone-wash vintage fade, cloudy light panels, slightly darker seam/pocket shading and warm pale yarns in distress zones. Avoid a green/yellow cast and avoid harsh over-bleached patches.

Fabric target: 100% cotton denim, approx. 12.5–13.5 oz (confirm with mill); 3/1 twill; structured hand. Confirm shrinkage and post-wash measurements.

Sample approval sequence: approve fabric and wash swatch → approve W32 fit sample → tape and approve tear placements → approve embroidery strike-off → test wash and hardware → record final post-wash measurements → start bulk.

FACTORY NOTE

All measurements and placements are proposed targets derived from the concept image, not verified measurements from a physical garment. The factory must confirm pattern, grading, wash recipe and exact positioning on a physical sample before bulk production.
